

CARBON MONOXIDE KILLS....DON'T BET YOUR LIFE ON IT!

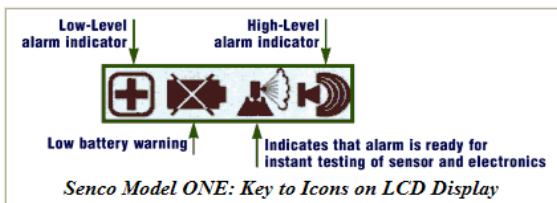

Protect those you love from carbon monoxide poisoning with the latest technology in carbon monoxide detection...the Senco ONE!

The Senco ONE is the most economical low-level CO detector on the market today. **The Senco Model ONE indicates exact CO concentrations in PPM for values from 10 to 999 PPM, with display accuracy within 10%.** For concentrations below 10 PPM, the display reads zero. The unit provides two alarm levels, both visually (flashing red light) and aurally (85dB horn). The low-level CO warning will activate at prolonged concentrations between 35 and 70 PPM. and the high-level alarm will activate at concentrations of 70 PPM or above. The time-to-alarm depends on the CO concentration - the higher the concentration, the quicker the unit will alarm.

New #1 Rated Technology Featuring:

- **Digital Display**—Displays levels of carbon monoxide (CO) from 30 to 999 parts per million (PPM).
- **Peak Level Memory**—Recalls the highest CO level present during the past four weeks.
- **Battery Powered**—Ensures your safety in the event of a power outage. Battery will provide power for more than one year.
- **Instant CO Test**—By pushing the test button, the unit will give you an instant CO reading in any room near any appliance.
- **Portable**—You can mount this unit to the wall or place it on any table top.

The Senco also features a test mode in which the sensor can be tested using a known source of CO (e.g., a lighted cigarette or incense stick), and a peak-level memory that displays the highest CO concentration encountered during the past 4 weeks (resettable). A low-battery icon tells you when it's time to replace the 9-volt alkaline battery, which typically is good for at least one year.

The Senco Model ONE sells for only \$64.95. Sure, you can find cheaper residential detectors at Wal-Mart or Home Depot, but we think the greater sensitivity of the Senco Model ONE is well worth it. The Senco also comes with a six-year free-replacement limited warranty from the manufacturer (and you won't find that at Wal-Mart).

Your family deserves the best! So, what are you waiting for? Pick up the phone and call Action today!
